- 1) Distance from end of base to tip of anode or cathode (cold)
- 2) With cable connection (M 10)
- 3) With cable connection (M10)
- 4) Maximum permissible base temperature: 200 °C
- 5) Anode on top
- 6) With cable connection (M 8)

Safety advice

Because of their high luminance, UV radiation and high internal pressure (when hot) HBO lamps may only be operated in enclosed lamp casings specially constructed for the purpose. Mercury is released if the lamp breaks. Special safety precautions must be taken. More information is available on request or can be found in the leaflet included with the lamp or in the operating instructions.

Application advice

For more detailed application information and graphics please see product datasheet.
