

HMI brand EVENT

Metal halide lamps, single-ended

Areas of application

- Events, trade fairs or exhibitions of cars, boats, industrial plants and motorcycles

Product family benefits

- Extremely uniform light distribution, reduced color or brightness shifts
- Constant daylight color temperature throughout the entire lamp lifetime
- High light output
- Very good color rendering index of $R_a > 90$ throughout the whole lamp lifetime
- Minimal light scattering
- Optimized filling

Product family datasheet

Safety advice

Because of their high luminance, UV radiation and high internal pressure during operation, HMI lamps may only be operated in enclosed lamp casings specially constructed for the purpose. Appropriate filters must ensure that UV radiation is reduced to an acceptable level. Mercury is released if the lamp breaks. Special safety precautions must be taken. Information on safety and handling is available on request or can be found in the leaflet included with the lamp or in the operating instructions.

Application advice

For more detailed application information and graphics please see product datasheet.
