# **OSRAM**

# Round MX260-CB

**ECE certified - ECE R7R112** 

The necessary tests and approvals were carried out and an ECE type approval was granted2)ECE reference number: 50

**Combo Beam** 

Designed for both: far-field and near-field illumination. For widespread illumination in the near field and spot illumination in the far field.

Light beam up to 350 m length

See and be seen with OSRAM

on-road & off-road

Versatile applicable and flexible in use.On-road & off-road, in terrain, at work and in the spare time.

# Bringing light to life with OSRAM LEDriving driving and working lights

Considerable foresight on dark country roads, forest paths, off the beaten tracks, off-road and on-road- this can be achieved with the OSRAM LEDriving Round MX260-CB. With its 16 powerful, high-performance long-life LEDs, the OSRAM LEDriving Round MX260-CB has a range of up to 350 meters and thus offers the driver impressive foresight on-road and off-road. Even in dim light and reduced visibility due to external environmental influences, the OSRAM LEDriving Round MX260-CB with up to 6000 Kelvin can provide conditions similar to daylight. The power package with up to 3500 lumens of luminosity scores with highest optical efficiency and homogeneous light distribution. This results in the possibility of an improved view for you and the improved visibility of your vehicle by other road users, and consequently also increased safety on-road and off-road. Whether on-road or off-road - The OSRAM LEDriving Round MX260-CB impresses with its powerful performance and a long service life with up to 5000 hours. Versatile applicable, it defies numerous environmental influences and, thanks to high-quality materials such as the aluminum housing and the stable polycarbonate lens, it is particularly light and at the same time robust and resistant. The OSRAM LEDriving Round MX260-CB has been tested and validated with the IP-Protection Class IP69K in our DIN certified environmental simulation laboratory for extreme external influences regarding water, dust, impacts, heat, cold and permanent vibration. The integrated driver and the thermal management system regulate the temperature of the LED driving light and can thus prevent damage from overheating. The polarity protection inhibits the wrong polarity of the voltage supply and can thus prevent possible damage by automatically switching off the LEDs. On-road and off-road, the OSRAM LEDriving Round MX260-CB is an effective and efficient addition to your vehicle. No registration or entry in the vehicle documents is necessary for these ECEcertified LED driving lights2).ECE reference number: 50The OSRAM LEDriving Round MX260-CB can be attached to cars, trucks, agricultural machinery, farm machinery, commercial vehicles, construction vehicles, caravans, off-road vehicles and quads2). The OSRAM LEDriving Round MX260-CB is versatile applicable and flexible in use.2) OSRAM LEDriving Driving Lights are approved according to ECE regulations and may therefore be installed and operated on public roads. Please note: Special installation regulations apply. In addition to ECE approval of the product, individual special requirements and legislation of the countries must be observed.

#### Legal advice:

The installation of the OSRAM LEDriving Round MX260-CB is fully ECE compliant and therefore registration free. This does not include individual custom requirements of countries, in addition to the standardized ECE certification of the product.

- 1) Precise terms and conditions at: www.osram.com/am-guarantee
- 2) OSRAM LEDriving Driving Lights are approved according to ECE regulations and may therefore be installed and operated on public roads. Please note: Special installation regulations apply. In addition to ECE approval of the product, individual special requirements and legislation of the countries must be observed.

Refer to www.osram.com/am-guarantee for precise conditions

#### **Application advice**

For more detailed application information and graphics please see product datasheet.
